

1 **CLAIMS**

2       **1.**     A game console, comprising:  
3       a memory;  
4       a processor; and  
5       a console application stored in memory and executable on the processor,  
6 the console application restricting access to content based on a parental control  
7 setting.

8  
9       **2.**     A game console as recited in claim 1 wherein the parental control  
10 setting is associated with a particular media type.

11  
12       **3.**     A game console as recited in claim 1 wherein the parental control  
13 setting is associated with a rating system used in a country for which the game  
14 console is configured.

15  
16       **4.**     A game console as recited in claim 1 wherein the console application  
17 restricts access to content based on a plurality of parental control settings, each of  
18 the plurality of parental control settings is associated with a particular media type.

19  
20       **5.**     A game console as recited in claim 1 wherein the parental control  
21 setting is associated with game content.

22  
23       **6.**     A game console as recited in claim 1 wherein the parental control  
24 setting is associated with audio content.

1           7.    A game console as recited in claim 1 wherein the parental control  
2 setting is associated with video content.

3  
4           8.    A game console as recited in claim 1 wherein the parental control  
5 setting is associated with online content.

6  
7           9.    A game console as recited in claim 1 wherein the memory comprises  
8 a hard disk drive.

9  
10          10.   A game console as recited in claim 1 wherein the console  
11 application presents a user interface that allows entry of at least one parental  
12 control setting.

13  
14          11.   A game console as recited in claim 1 wherein the console  
15 application presents a user interface that allows entry of a game content parental  
16 control setting, an audio content parental control setting, a video content parental  
17 control setting, and an online content parental control setting.

18  
19          12.   A game console as recited in claim 1 wherein the console  
20 application presents a user interface that allows entry of a password associated  
21 with at least one parental control setting.

1           **13.**    A method comprising:  
2           identifying content to be executed on a game console;  
3           identifying a parental control setting;  
4           analyzing the content to be executed on the game console using the parental  
5           control setting; and  
6           executing the content on the game console if the content satisfies the  
7           parental control setting.

8  
9           **14.**    A method as recited in claim 13 wherein the content to be executed  
10          on the game console is game content.

11  
12          **15.**    A method as recited in claim 13 wherein the content to be executed  
13          on the game console is audio content.

14  
15          **16.**    A method as recited in claim 13 wherein the content to be executed  
16          on the game console is video content.

17  
18          **17.**    A method as recited in claim 13 wherein analyzing the content  
19          includes determining a rating associated with the content and comparing that  
20          rating to the parental control setting.

21  
22          **18.**    A method as recited in claim 13 wherein the parental control setting  
23          is associated with the type of content to be executed on the game console.  
24  
25

1       **19.**    A method as recited in claim 13 wherein identifying the parental  
2 control setting includes identifying the parental control setting associated with the  
3 type of content to be executed on the game console.

4  
5       **20.**    A method as recited in claim 13 further including forgoing  
6 execution of the content on the game console if the content fails to satisfy the  
7 parental control setting.

8  
9       **21.**    A method as recited in claim 13 further including generating a  
10 message indicating unacceptable content if the content does not satisfy the  
11 parental control setting.

12  
13       **22.**    One or more computer-readable media comprising computer-  
14 executable instructions that, when executed, perform the method as recited in  
15 claim 13.

16  
17       **23.**    A method comprising:  
18       identifying a type of content to be accessed by a game console;  
19       identifying a parental control setting associated with the type of content to  
20 be accessed by the game console;  
21       analyzing the content to be accessed by the game console using the  
22 identified parental control setting; and  
23       allowing the game console to access the content if the content satisfies the  
24 identified parental control setting.  
25

1           **24.**    A method as recited in claim 23 wherein the type of content to be  
2 accessed by the game console is game data.

3  
4           **25.**    A method as recited in claim 23 wherein the type of content to be  
5 accessed by the game console is audio data.

6  
7           **26.**    A method as recited in claim 23 wherein the type of content to be  
8 accessed by the game console is video data.

9  
10          **27.**    A method as recited in claim 23 wherein the type of content to be  
11 accessed by the game console is online data.

12  
13          **28.**    One or more computer-readable media comprising computer-  
14 executable instructions that, when executed, perform the method as recited in  
15 claim 23.

16  
17          **29.**    A user interface for a game console, comprising:  
18           a main menu configured to identify different media types that may be  
19 played by the game console; and  
20           a parental control settings menu accessible from the main menu to allow a  
21 user to set various content restrictions for each of the different media types that  
22 may be played by the game console.

1           **30.**    A user interface as recited in claim 29 wherein the different media  
2 types that may be played by the game console include a game media type, a music  
3 media type, and a movie media type.  
4

5           **31.**    A user interface as recited in claim 29 wherein the parental control  
6 settings menu further allows a user to set a password to prevent unauthorized  
7 modification of the parental control settings.  
8

9           **32.**    A user interface for a game console, comprising:  
10           a range indicator that identifies a range of content restriction levels; and  
11           a control movable relative to the range indicator to select a particular  
12 content restriction level.  
13

14           **33.**    A user interface as recited in claim 32, further comprising a first  
15 display region to identify a particular media type that may be played by the game  
16 console, the range indicator being adapted to identify ranges of content restriction  
17 levels for the media type identified in the first display region.  
18

19           **34.**    A user interface as recited in claim 32, further comprising a second  
20 display region to identify a summary of the content restriction for the currently  
21 selected content restriction level.  
22  
23  
24  
25

1           **35.**   A computer-readable medium for a game console comprising  
2 computer-executable instructions that, when executed, cause the game console to:  
3           identify content to be played by the game console;  
4           identify a parental control setting associated with the identified content;  
5           determine whether the identified content satisfies the parental control  
6 setting; and  
7           playing the identified content if the identified content satisfies the parental  
8 control setting.

9  
10           **36.**   A computer-readable medium as recited in claim 35 wherein the  
11 identified content to be played by the game console is selected from a group of  
12 media types comprising game data, audio data, and video data.

13  
14           **37.**   A computer-readable medium as recited in claim 35 wherein the  
15 instructions further cause the game controller to modify the parental content  
16 settings after a user enters a valid password associated with the parental content  
17 settings.
